

Introduction to Nativ Systems

Nativ Systems is an IT outsourcing company specialising in the design and management of rich-media business systems. Through working closely with our clients and applying thorough strategic and project planning we deliver expert solutions and increased business performance.

Across the technology, media and telecommunications (TMT) sectors, companies are seeing the benefits of outsourcing aspects of their business to specialist partners such as Nativ Systems.

As broadcast and rich-media IT systems increase in terms of their reach and complexity there is an ever-growing requirement for companies to develop and maintain more advanced enterprise systems. However, some of the challenges faced are not altogether straightforward and require thorough strategic planning and specialist technology skills. In addition, support and maintenance of such systems is often costly, risky and diverts resource from other areas of the business.

Consulting...

From a consultancy standpoint we adopt a target-driven approach. We assist our clients with gathering, analysing and prioritising business requirements and answering such challenges in terms of a coherent IT strategy. We also assist with financial planning and modelling and ensuring the application of IT systems lowers operational overheads and maximises profits.

Technology...

Nativ Systems is an expert in enterprise technology delivery and IT-lead project management. We have a wealth of knowledge and experience in designing large-scale rich-media, enterprise IT systems using a wide range of industry-recognised technologies such as J2EE, .NET, web services and relational database systems. Through our sister company, Nativ, we have industry-leading expertise in broadcast and rich-media technology solutions.

Outsourcing...

Through its internal team of experts and its global partners, Nativ Systems has a huge outsourcing capacity. Our capability covers:

- On-shore systems integration
- Offshore/on-shore systems engineering
- Programme management and project governance
- QA and testing
- 365 x 24 x 7 high-end enterprise hosting and application support

Nativ Systems is one of few companies that specialises in hosting and supporting complex rich-media, enterprise systems (as well as legacy systems).
